Transportation via ACCESS and California ID Card

Consumer Name:

Please provide a copy of the consumer's California ID Card so we can complete the application for the consumer to obtain an ACCESS card.

Once on board with ACCESS, the consumer will be transported to Life Skills on a STEADY RIDE with other consumers who attend Life Skills.

Consumer Who Does Not Have a California ID Card

If the consumer does not have a California ID, we can assist the consumer in obtaining one. We will need a copy of the ***consumer's birth certificate***.

The consumer has many advantages to having a California ID Card and an ACCESS card. A California ID Card is consistent with the HCBS Rule for consumers to function in the community like everyone else. In case of a medical emergency, the California ID card can facilitate medical treatment and contact with the home and family.

An Access card frees consumers who are safety trained to travel independently in the community without being dependent on care providers.
